DETAILED ACTION

1. This communication is in response to the request for continued examination filed 2/26/09 and subsequent pre-appeal conference decision. After a search and thorough examination of the present application and in light of the prior art made of record, claims 19-27, 31, 36-44, 48, 52-53 (renumbered as 1-22) are allowed.

Reason for allowance

2. In light of the present invention's document scoring and clustering of documents via scoring logic including a frequency sub-module a concept weight sub-module a structural weight sub-module a corpus weight sub-module; a scoring evaluation sub-module using the formula $S = \sum F \times CW \times SW \times RW$. Where S comprises the score, F comprises the frequency, $0 < CW < 1$ comprises the concept weight, $0 < SW < 1$ comprises the structural weight, and $0 < RW < 1$ comprises the corpus weight for occurrencej of concept i; Moreover, in light of the present inventions claimed vector sub-module, determination sub-module, clustering module, cluster seed sub-module, identification sub-module, comparison sub-module, clustering sub-module, threshold module, the presently claimed invention is allowable. As for the eligibility of the subject matter of claims 52 and 53 examiner has found applicant's previous arguments persuasive "No limitations to a computer-readable storage medium or embodied on a transmission medium in a carrier wave are recited. The same observation can be made about independent system Claim 18, which, as amended, recites a scoring module that comprises a frequency module, concept weight module, structural weight module,

corpus weight module, and scoring evaluation module; and a clustering module that comprises a duster seed module and threshold module.” (Applicant’s response dated September 18, 2006). Applicant’s comments in conjunction with the specification which states that the present invention is only meant for electronically stored documents (See specification pages 1-4). Accordingly, claim 52 must be executed by a processor and likewise the apparatus of claim 53 cannot be limited to software only but in fact does have hardware means. Therefore, claims 52 and 53 both meet the requirements of 35 U.S.C. 101.
